Sudoku Variants

Logo guide · the Nine Smile · v1.0

THE IDEA

A face in a sudoku cell. The left eye is a kropki-style dot; **the right eye is a 9, and the 9's tail is the smile**. Friendly at a glance, clever on a second look: 9 is the number every sudoku is built on.

VERSIONS

Primary: horizontal

COLOUR VERSIONS

Full colour on light

Full colour on dark

One colour (black)

One colour (white)

In one colour the blue tile becomes an outlined cell, so the face always sits in a cell.

COLOURS

Ink
HEX #0e0e12
RGB 14, 14, 18
CMYK 22 22 0 93
Wordmark, one-colour logo, dark backgrounds

Paper
HEX #f8f7f2
RGB 248, 247, 242
CMYK 0 0 2 3
Light backgrounds (the game's page colour)

Sudoku Blue
HEX #2a4fff
RGB 42, 79, 255
CMYK 84 69 0 0
Primary: the icon tile, Steam art

Gold
HEX #e8a020
RGB 232, 160, 32
CMYK 0 31 86 9
Accent only: highlights, badges; never the main logo

CMYK values are converted from RGB: proof before printing. Match Pantone with a swatch book.

DON'T

✕ stretch

✕ rotate

✕ recolour

✕ add effects

✕ mirror (the 9 must stay a 9)

✕ gold as the main icon

CLEAR SPACE AND MINIMUM SIZE

Keep clear space of **one eye** (the diameter of the left eye dot) on every side, at any size.

Version	Screen	Print
Horizontal lockup	120 px wide	30 mm wide
Stacked lockup	80 px wide	20 mm wide
Icon / symbol	16 px: use the **16 px pixel file**	6 mm

SMALL SIZES

16 px cut (enlarged)

32 px and up

At 16 px the vector 9 fills in, so a hand-drawn pixel version is used. The `.ico` files already combine both: pixel art at 16 px, vector from 24 px up.

TYPOGRAPHY

- **Logo and headings:** DM Serif Display (the wordmark is drawn from it and outlined; never retype it).
- **Body and UI:** DM Sans.
- Both are free under the SIL Open Font License (in the game's `fonts/`).

DO

- Use the files as they are; scale them evenly.
- Use the blue tile as the game, Steam and Windows icon.
- On photos or busy art, use the tile icon or put the logo on a calm area.
- Keep gold as an accent, never the main logo colour.

FILES

`master/` symbols (SVG) · `lockups/` horizontal, one-line, stacked, wordmark · `png/` ready-made PNGs · `godot/` `icon.svg` + Windows `.ico` · `steam/` store and library images + client/shortcut icons · `web/` favicon set · `board/` presentation. SVG for screens and print, PNG when a tool needs pixels.
